What is STEM+E Competition?

The STEM+E Competition has been organised by STEM+E Consortium since 2018. It provides secondary school students with the opportunity to learn and develop essential life skills: creative mindset, critical thinking, resilience and perseverance in this 3-month journey. Under the guidance of start-up founders and business professionals, students will understand how technology solutions can solve real-world problems and learn how to apply these technology solutions to address pain-points identified in school or the community. Ultimately, students will transform their creative ideas into business plans and perform start-up pitching to compete for the championship.
